Jl. of Computing in Childhood Education (1994) 5(3/4), 395-403

INDEX OF ARTICLES
VOLUMES I-V (1989-1994)

VOL. 1, NO. 1 (FALL 1989)

Editorial. *Gary Marks*, p. 3.

Initial Logo Mastery in Young Children: What is Learned and What Are the Prerequisites for Learning? *J. Allen Watson and Christian Busch*, p. 5.

Ethical Computing in K–6 Classrooms. *Nancy Hunt and Marilyn Shelton*, p. 21.

The Impact of Word Processing and Play Training on Literacy Development. *Marcia Guddemi and Heidi Mills*, p. 29.

Playing with Electric Trains in School Classrooms. *Thomas S. Catherall*, p. 39.

New Directions in Software Development for Young Children. *June Wright, Daniel D. Shade, Suzanne Thouvenelle, and Jane Davidson*, p. 45.

Prescriptions for Reading CAI: A Study Considering the Effects of Three Instructional Combinations with Either Computer-Adaptive or Controlled Placement on Reading Achievement Levels. *Carole L. Bond and Roy B. Clariana*, p. 59.

Enriching the Contexts of Explanation: The Importance of Adult Mediation and Children's Learning. *Richard T. Johnson*, p. 73.

The Effect of Computer Simulated Number Blocks on Retention of Double-Digit Addition and Subtraction Ability. *Gary A. Deatsman and Sue Keough*, p. 85.

The Computer Lab: A Creative School-Based Staff Development Project. *Olivia S. Reusing*, p. 95.

VOL. 1, NO. 2 (WINTER 1989/90)

Children's Hypermedia Compositions. *Anne Nicol*, p. 3.

Low-Overhead Logo for Teaching Math to Children. *Larry Flick*, p. 19.

Computer Use in Preschools: Views of Parents, Teachers, Preservice Teachers and 3- to 5-Year-Olds. *Janie H. Humphries and Benjamin Silliman*, p. 31.

Floating Hypotheses and Fuzzy Knowledge: Computers and the Informal Curriculum. *Julia Blackstock and Larry Miller*, p. 37.

The Team Approach and Logo. *Lawrence L. Krajewski*, p. 57.

Teacher Effectiveness and CAI: The Relationship Between Teacher Computer Usage and

Student Achievement in Reading. *Barbara A. Schaudt*, p. 65.

Pointing Behaviors of Preschoolers During Logo Mastery. *Vickie M. Brinkley and J. Allen Watson*, p. 83.

Patterns of Change: Educational Reform During the Industrial and Computer Eras. *Judith B. Harris*, p. 99.

Two Experiences with Computers in the Elementary Classroom. *Norman Baron*, p. 113.

Vol. 1, No. 3 (Spring 1990)

Early Visual Spelling on the Microcomputer. *Roy A. Moxley and Bonnie G. Joyce*, p. 3.

An Exploratory Study of Lego Logo. *Janice L. Flake*, p. 15.

Does Science Software Address the Scientific Method? *Cathy L. Thompson and Sharon E. Smaldino*, p. 23.

The Effects of Presentation Mode on the Decision-Making Process. *John C. Park*, p. 29.

Spatial Ability, Construction Toys, and Technology. *Janice L. Flake*, p. 45.

A Reluctant Writer Joins In. *Harriet Schweitzer*, p. 57.

A Turnkey MicroWorld. *Mark D. Greenman*, p. 65.

A Pattern Block MicroWorld. *Mark D. Greenman*, p. 77.

Rate of Activity Completion by Achievement, Sex and Report in Computer-Based Instruction. *Roy B. Clariana*, p. 81.

Vol. 1, No. 4 (Summer 1990)

Mathematics Software for Young Children. *Edwin M. Dickey*, p. 3.

The Effects of Computer Managed Cognitive/Perceptual Tasks on Achievement of Basic Concept Skills. *James L. Fitch and Juanita L. Sims*, p. 15.

Spatial Sense and Technology. *Janice L. Flake*, p. 21.

Comparing the Use of the Dvorak and QWERTY Keyboards by Young Children. *Bonnie G. Joyce and Roy A. Moxley*, p. 35.

Using Computers in a Summer Mathematics Clinic. *Evelyn M. VanDevender and Ruth Bealle*, p. 47.

Fifth and Sixth Grade German Students Learn Turtle Logo: A Pilot Study. *Dyanne M. Tracy and Michael A. Williams*, p. 55.

Vol. 2, No. 1 (Fall 1990)

Assessing Children's Attitudes Towards Computers: The Draw-A-Computer User Test. *Robertta H. Barba*, p. 5.

Using Maps and Computers as Integrative Tools for the Elementary Classroom. *Janice L. Flake and Marvel Lou Sandon*, p. 19.

The Effects of Practice and Input Device Used on Young Children's Computer Control. *Glenda L. Revelle and Erik F. Strommen*, p. 33.

Introducing PROLOG as an Educational Tool. *Antonio M. Lopez, Jr.*, p. 43.

Logitudinal Study of Mathematics Achievement for a Technological and Experiential Based Mathematics Curriculum. *Janice L. Flake and Marvel Lou Sandon*, p. 55.

Gender and Ability Differences in Galvanic Skin Response During Pair and Individual Computer-Assisted Math Instruction. *Roy B. Clariana*, p. 69.

Children and Computers Abstracts, p. 83.

Software Reviews, p. 91.

Book Reviews, p. 103.

Vol. 2, No. 2 (Winter 1990/91)

Some Influences of Classroom Computers on Academic Tasks. *Charles W. Fisher*, p. 3.

Space and Premathematic Strategies Young Children Adopt in Initial Logo Problem Solving. *J. Allen Watson and Vicki M. Brinkley*, p. 17.

The Effects of Integrating Computers Across a Primary Grade Curriculum. *Richard D. Kimpston, Julie D. Bass Haugen, Gregory C. Sales, S. Del Marie Rysavy, and Mary Kay Wagner*, p. 31.

Spelling Strategies of Three Prekindergarten Children on the Microcomputer. *Roy A. Moxley and Bobbie Warash*, p. 47.

The Effect of Computer Use on the Process Writing of Learning Disabled Students. *Neal F. Grandgenett, Carol V. Lloyd, and John W. Hill*, p. 63.

A Computer Based Interdisciplinary Problem Solving Geography Unit. *Mark D. Greenman*, p. 73.

Computer Assisted Formative Evaluation Procedures to Monitor Basic Skills Attainment in Elementary Schools. *James E. Bruno*, p. 79.

Children and Computers Abstracts, p. 105.

Software Reviews, p. 109.

Book Reviews, p. 119.

Vol. 2, No. 3 (Spring 1991)

The Development of Writing Skills in a Computer-Intensive Environment. *Steven M. Ross, Lana J. Smith, and Ellen Woodson*, p. 3.

Collaboration: A Model for Turning Teachers and Children on to Technology. *Jack Anderson, Diane Gess, and Pam Hale*, p. 21.

At-Home Remediation via Technology: An Exploratory Study of a Computer Loan Program. *Gregory C. Sales and Jason Earle*, p. 29.

Reducing Adult Computer Anxiety: Lessons from Preschool Child Tutors. *Lee Anne Doran and Michael F. Kalinowski*, p. 41.

An Integrated Learning System in an Elementary School: Implementation, Attitudes, and Results. *Catherine Alifrangis*, p. 51.

Computer Literacy for Student Teachers and Elementary Children Through Programming. *John D. Elliott*, p. 67.

Apple Global Education in UCOT. *Marvin Bratt*, p. 69.

Software Reviews, p. 75.

Vol. 2, No. 4 (Summer 1991)

A Study of Children's Computer-Generated Graphics. *Theresa H. Escobedo and Ambika Bhargava*, p. 3.

Peer Tutoring, Microcomputer Learning and Young Children. *Lois J. Baron*, p. 27.

Children in an Educational Robotics Environment: Experiencing Discovery. *Laura R. Winer and Hélène Trudel*, p. 41.

Keyboarding Effects on Primary Children's Academic Content Area Grades. *Patricia A. Ainsa*, p. 55.

Onscreen Perspective-Taking Behavior and Initial Logo Mastery by Young Children. *J. Allen Watson, Garrett Lange, and Vickie M. Brinkley*, p. 65.

A Model for a Successful System-Wide Computer Integration Plan. *Mark D. Greenman*, p. 77.

Creating a Reading/Writing Environment. *Beverly D. Stratton and Martha C. Grindler*, p. 85.

Children & Computers Abstracts, p. 91.

Software Reviews, p. 97.

Vol. 3, No. 1 (1992)

Empowering Classroom Teachers via Early Childhood Computer Education. *Patricia A. Ainsa*, p. 3.

The Effect of Computer Software on Preschool Children's Developmental Gains. *Susan W. Haugland*, p. 15.

Effects of an Educational Computing Course on Preservice Teachers' Attitudes and Anxiety Toward Computers. *Wilhelmina C. Savenye, Gayle V. Davidson, and K.B. Orr*, p. 31.

The Representation of Females in Computer Education Text for Grades K-12. *Gregg Brownell*, p. 43.

Promoting Language and Literacy for Young Children Through Computers. *Karin L. Rowland and Diana Scott*, p. 55.

The Young Children's Computer Inventory: A Likert Scale for Assessing Attitudes Related to Computers in Instruction. *Keiko Miyashita and Gerald Knezek*, p. 63.

Microcomputer Keyboarding Skills: Dvorak vs. Qwerty. *Mary Jane Ford and Virginia Poe*, p. 73.

Effects of Logo and Computer-Aided Instruction on Arithmetical Ability Among 7- and 8-Year-Old Zimbabwean Children. *David Wilson and Susu Lavelle*, p. 85.

Book Reviews, p. 93.

Children and Computers Abstracts, p. 97.

Vol. 3, No. 2 (1992)

Investigating the Development of Spatial Cognition in Problem-Solving Microworlds. *Patricia A. McClurg*, p. 111.

The Effect of Public Reports of Progress on Rate of Lesson Completion in Computer-Based Instruction. *Roy B. Clariana*, p. 127.

Writing Strategies of Three Prekindergarten Children on the Microcomputer. *Roy A. Moxley and Bobbie G. Warash*, p. 137.

Declarative Thinking and the Investigation of Spatial Relationships in a Block MicroWorld. *Antonio M. Lopez, Jr.*, p. 181.

A Holistic Approach to Guided Writing: Using the WICAT Program Supplemented with Peer Critique. *E. Ann Harris and Carole L. Bond*, p. 193.

Novice Writers and Word Processing in the One-Computer Classroom. *Judi Repman, Nancy B. Cothern, and Johnnie S. Cothern*, p. 203.

Children and Computers Abstracts, p. 215.

Vol. 3, No. 3/4 (1992)

Microcomputer Learning with a Tutorial Program—Manipulating Group Size and Exposure Time. *Lois J. Baron and Phillip C. Abrami*, p. 231.

Children, Chunking, and Computing. *Craig Graci, Randolph Odendahl, and Jack Narayan*, p. 247.

The Use of Digitized Images in Developing Software for Young Children. *June L. Wright, Jacqueline Seppy, and Leslie Yenkin*, p. 259.

A Microcomputer Learning Center in Head Start: A Pilot Study. *James L. Fitch and Juanita L. Sims*, p. 285.

Telecommunications Promotes Summer Reading and Writing: A Pilot Project Report. *Barbara Erickson, Alma Allen, and Lee Mountain*, p. 295.

Knowledge Representation and Cognitive Outcomes of Teaching Logo to Children. *J. David Williamson and Dean W. Ginther*, p. 303.

Expert Systems and Weather Forecasting in the 4th and 5th Grade. *James J. Kirkwood and Rnady H. Gimblett*, p. 323.

Young Learners' Reactions to Problem Solving Contrasted by Distinctly Divergent Computer Interfaces. *David W. Brown and Shanon D. Schneider*, p. 335.

The Effects of Drill-and-Practice Computer Instruction on Learning Basic Mathematics Facts. *Nancy Harrison and Evelyn M. Van Devender*, p. 349.

Children & Computers Abstracts, p. 357.

Vol. 4, No. 1 (1993)

Emergent Literacy: Implications for the Design of Computer Writing Applications for Children. *Anthony E. Kelly and James B. O'Kelly*, p. 3.

Motivational and Social Outcomes of Cooperative Computer Education Environments. *Bonnie K. Nastasi and Douglas H. Clements*, p. 15.

"Does Yours Eat Leaves?" Cooperative Learning in an Educational Software Task. *Erik F. Strommen*, p. 45.

Time Studies of Fourth Graders Generating Alternative Solutions in a Decision-Making Task Using Models and Computer Simulations. *John C. Park*, p. 57.

Spatial Strategy Use During Logo Mastery: The Impact of Cognitive Style and Development Level. *Charles E. Easton and Allen Watson*, p. 77.

Vol. 4, No. 2 (1993)

Effects of Gender on Preschoolers' Play and Learning in Logo Environments. *Alison Elliott*, p. 103.

The Use of Computers to Enhance Science Instruction in Preschool and K-3 Classrooms. *Robert E. Yager, Susan M. Blunck, and Eric T. Nelson*, p. 125.

Mediational Elements in Computer Programming Instruction: An Exploratory Study. *Victor R. Delcros and Susan Burns*, p. 137.

Domain Knowledge, Cognitive Styles, and Problem Solving: A Qualitative Study of Student Approaches to Logo Programming. *Karen Swan*, p. 153.

Attending Behaviors of ADHD Children in Math and Reading Using Various Types of Software. *Mary Jane Ford, Virginia Poe, and Juanita Cox*, p. 183.

Children & Computers Abstracts, p. 197.

Vol. 4, No. 3/4 (1993)

The Impact of Cognitive Styles on the Problem Solving Strategies Used By Preschool Minority Children in Logo Microworlds. *Jean Allen, J. Allen Watson, and Janice R. Howard*, p. 203.

Computer Use in Elementary Classrooms: An Ethnographic Study. *M. Gail Hickey*, p. 219.

Lego-Logo as a Learning Environment. *Kwok-Wing Lai*, p. 229.

Family Changes: An Extension of Young Children's Classroom Computer Interactions. *Patricia A. Ainsa*, p. 247.

Using Readability Formulas to Establish the Grade Level Difficulty of Software. *Roy B. Clariana*, p. 255.

Research on Logo: Effects and Efficacy. *Douglas H. Clements and Julie S. Meredith*, p. 263.

Spell Checkers: Aids in Identifying and Correcting Spelling Errors. *Lorana Jinkerson and Patricia Baggett*, p. 291.

A Comparison of the Effects of Lego TC Logo and Problem Solving Software on Elementary Students' Problem Solving Skills. *Debra L. Palumbo and David B. Palumbo*, p. 307.

Children & Computers Abstracts, p. 325.

Vol. 5, No.1 (1994)

Attitudes Toward Intergrating Computers into the Classroom: What Parents, Teachers and Students Report. *Gayle V. Davidson and Scott D. Ritchie*, p. 3.

Supplementing Teachers' and Researchers' Use of Concrete Manipulatives in the Classroom with the Use of Digital Manipulatives. *Anothony E. Kelly and James B. O'Kelly,* p. 29.

A Descriptive Study Comparing Computer-Based Word Processing and Handwriting on Attitudes and Performance of Third and Fourth Grade Students Involved in a Program Based on a Process Approach to Writing. *Lori Seawel, Sharon E. Smaldino, Jeannie L. Steele, and Junko Yokota Lewis*, p. 43.

The Impact of a Computer-Based Adventure Game on Achievement and Attitudes in Geography. *James H. Wiebe and Nancy J. Martin*, p. 61.

Effect of Computer Use on Attitudes Among Japanese First- and Second-Grade Children. *Keiko T. Miyashita*, p. 73.

Early Childhood Computer Software. *Susan W. Haugland and Daniel D. Shade*, p. 83.

Using a Computer-Based Semantic Mapping, Reading, and Writing Approach with At-Risk Fourth Graders. *Richard Sinatra, Jeffrey Beaudry, Jeanne Pizzo, and Gene Geisert*, p. 93.

Vol. 5, No.2 (1994)

Viewpoint: Classroom Technology and the New Pedagogy. *Charles Fisher, Faye Wilmore, and Robert Howell*, p. 119.

The Knowledge Express Project: Using Technology to Support Changes in Pedagogy. *Charles Fisher, Faye Wilmore, and Robert Howell*, p. 131.

Extending a Tradition: Teacher Designed Computer-Based Games. *Anthony E. Kelly and James B. O'Kelly,* p. 153.

Software for the Early Childhood Classroom: What Should It Look Like? *Michael L. Henniger*, p. 167.

Computers and Young Children: Software Types, Social Contexts, Gender, Age, and Emotional Responses. *Daniel D. Shade*, p. 177.

Computer Writing Development in a Prekindergarten Class of 4 Year Olds. *Roy A. Moxley, Bobbie Warash, Ginger Coffman, Laura Marie Geres, Tiffany Roman, and Leanne E. Terhorst,* p. 211.

Vol. 5, No. 3/4 (1994)

Computers and Preschool Children's Play: Are They Compatible? *Michael L. Henniger*, p. 231.

Electronic Impersonaltions: Changing the Context of Teacher-Student Interaction. *Judith B. Harris,* p. 241.

Usability and Children's Software: A User-Centered Design Methodology. *Jenifer Walsh Robertson*, p. 257.

Multimedia Constructions of Children: An Exploratory Study. *Peter Gouzouasis*, p. 273.

Children's Independent Exploration of a Natural Phenomenon by Using a Pictorial Computer-Based Simulation. *Marjatta Kangassalo*, p. 285.

An Investigation into the Use of a Concept Keyboard as a Computer-Related Device to Improve the Structure of Young Children's Writing. *Martyn Wild and Jenny Ing*, p. 299.

Motivating At-Risk Students Using a Literature Based Writing Unit with Computers. *Diana Scott, Pamela Kahlich, and Jeanne Barker*, p. 311.

Comparisons of Spontaneous and Word Processed Compositions in Elementary Classroons: A Three-Year Study. *Edward L. Shaw, Jr., Ann K. Nauman, and Debbie Burson*, p. 319.

The Role of Computers in Functional Language: A Tale of Two Writers. *Judith F. Kent and Jennie Rakestraw*, p. 329.

Computers in Preschool Education: An Interactive Environment. *T.A. Mikropoulos, P. Kossivaki, A. Katsikis, and C. Savranides*, p. 339.

A Teaching Methodology for the Hearing Impaired Using Hypermedia and Computer Animation. *I. Aedo, P. Miranda, F. Panetsos, N. Torra, and M. Martín*, p. 353.

Resource of CAI Software Packages for Geography Education in Elementary Schools. *Ronghua Ouyang and Ruth Shirey*, p. 369.
